

Our mission is to coalesce, inspire, and support the Head Start field as a leader in early childhood development and education.

June 5, 2025

The President
The White House
1600 Pennsylvania Avenue, NW
Washington, DC 20500

Dear Mr. President,

We, the 52,000 undersigned parents, caregivers, and alumni of the Head Start program, write to you today with a simple message: **Head Start has changed our lives. We urge you to support and strengthen it.**

Every day, nearly 700,000 children in communities in every corner of our country travel by bus, car, van, foot, and even boat to Head Start classrooms that welcome them with warmth, feed them healthy meals, and set them up for a lifetime of success. Every day, the parents of these children rely on Head Start so that they can earn an honest living and become economically self-sufficient. Every day, more than 40 million Americans enter schools, offices, and job sites better prepared to power America forward thanks to the start they received as children in Head Start.

We know you stood strong for Head Start in your first term as President of the United States—providing resources and appropriate flexibilities to set our children up for success in school and in life. We thank you for your steadfast support and commitment.

And we believe that, with your leadership, we can recover from the trying times of the last few years and enter a new golden age of Head Start - expand the opportunity that Head Start provides to hundreds of thousands of working families and their children, who are now ready to tackle the challenges of the world.

Head Start is designed as a multi-generational support to families and has been a lifeline for parents, grandparents, and caregivers. Many of us face or have faced financial hardships. Some of us have experienced homelessness, domestic violence, or addiction. Some of us are foster parents or were in the foster care system as children. But all of us work hard in our communities trying to achieve our American dream thanks to the path Head Start set us on.

Head Start doesn't just help children succeed in their earliest years of life—it establishes the environment for lifelong success. In addition to the great work our teachers do every day, we know our children will get early identification and special support and services for language or speech delays, health or dental issues. Head Start assists families, like many of ours, in creating stable homes and pursuing what we believe is in the best interest of our children. Head Start allows us to work and complete our education knowing that our children are in safe, healthy, and caring classrooms. It builds stronger communities by giving our children a solid foundation and a fighting chance.

Head Start is one of the most cost-effective federal programs in our country. The research shows it, our own stories prove it, and the more than half a century track record of bipartisan support from Congress and every U.S. President demonstrates it. Decades of research show Head Start improves school readiness, strengthens families, and contributes to our nation's economic success¹. It's not just taking care of kids so that parents can work—it's building stronger communities and saving taxpayer dollars long-term. If we're serious about smart investments, we should be investing more in Head Start, not eliminating it.

Please do everything in your power to resist any call to cut or dismantle Head Start. Instead, we respectfully ask that you support and strengthen this vital program. The investment in our children today builds the workforce, leaders, and strong families of tomorrow.

Thank you for listening and for standing with America's families.

Sincerely,

Head Start parents, caregivers, and alumni
